# About Us

---

It's not so much what we do, but how well we do it. Our distribution center is strategically located, well-stocked and staffed by employees who understand your business and know how to add value. We offer will call, fast local delivery service and nationwide shipping so you get what you need when and where you need it with competitive pricing. With an unmatched combination of the industry's most experienced management and employees, we follow through every day with innovative solutions for residential, commercial, industrial and high security perimeter security challenges.

Fence1 Distribution LLC is your full-service wholesale fence, deck and access control distributor with brands you know and trust. Fence1 Distribution LLC also supplies standard aluminum and steel frame gates, panels, wood, vinyl and hardware quickly and efficiently. For projects with more unique or significant challenges, Fence1 Distribution LLC can help custom design with enhanced fabricating capabilities.

ON-TIME DELIVERY

The background of the entire image consists of three vertical wooden planks. The leftmost plank is yellow pine, showing a light tan color with prominent vertical grain lines and some darker knots. The middle plank is red pine, which is a reddish-brown color with a similar vertical grain pattern. The rightmost plank is pre-stained, showing a uniform, warm orange-brown color with a smooth texture. A semi-transparent white rectangular box is centered in the upper half of the image, containing promotional text.

# Genuine Galvanized Tube

Made in the USA 

Dynamic Tube & Pipe, a division of Dynamic Metals, is committed to producing only top quality, superior strength, galvanized inside and out, framework. Our dedication begins with decades of experience in the steel industry, and staffed with professionals from every aspect of steel production, testing, handling and quality assurance. Through our experience we acknowledge the importance of both interior and exterior protection. By using only prime steel, high grade zinc and superior coating technology, we can assure our customers of receiving the best Tube and Pipe products available today.

It all begins with prime base metal, which is then hot-dipped galvanized with high grade zinc on both sides, ensuring inside and out protection. This is followed by a chromate conversion process which protects and prepares the steel for the final coating. The exterior is then finished with a specially formulated clear acrylic for durability and shine.

## DYNA COAT Color Fence Framework

### Residential

### Commercial

### Industrial

### Dyna Powder Coat System

- 
- All Products Manufactured in the USA
  - Multi-Stage Wash System
  - State of the Art Electrostatic Equipment
  - Highest Quality Polyester Powder
  - Meets and Exceeds all Industry Standards

Our color framework is cleaned and pretreated in a five stage high powered industrial wash system. After drying, premium polyester powder is applied using state of the art electrostatic equipment. The pipe and tube is then baked at a time and temperature that assures complete curing of the coating. The process includes detailed inspections to insure adhesion and durability. Our properly cured polyester powder, offers a superior long term finish to meet and exceed our customer's needs.

Chain link mesh is available in a variety of finishes, with black and galvanized being among the most popular options. Black chain link mesh offers a sleek, modern appearance that blends seamlessly with its surroundings, making it a popular choice for residential and commercial properties. The black coating, often made of vinyl or powder, provides additional protection against rust and corrosion, ensuring long-lasting durability.

On the other hand, galvanized chain link mesh is known for its classic, industrial look and exceptional strength. The galvanization process involves coating the steel with a layer of zinc, which acts as a barrier against rust and environmental damage. This makes it an ideal choice for areas prone to harsh weather conditions.

Both black and galvanized chain link meshes are versatile and can be used in a variety of applications, from securing yards and playgrounds to enclosing industrial areas. Regardless of the color chosen, each type offers reliable security and requires minimal maintenance, making them a practical solution for fencing needs.

**Chain link fittings are crafted to perfectly match various fence sizes and requirements. From securing the tops of posts to tightening the mesh, each component plays a crucial role in constructing a fence that is not only safe and stable but also effortlessly maintained.**
