Genuine Galvanized Tube

Made in the USA 

Dynamic Tube & Pipe, a division of Dynamic Metals, is committed to producing only top quality, superior strength, galvanized inside and out, framework. Our dedication begins with decades of experience in the steel industry, and staffed with professionals from every aspect of steel production, testing, handling and quality assurance. Through our experience we acknowledge the importance of both interior and exterior protection. By using only prime steel, high grade zinc and superior coating technology, we can assure our customers of receiving the best Tube and Pipe products available today.

It all begins with prime base metal, which is then hot-dipped galvanized with high grade zinc on both sides, ensuring inside and out protection. This is followed by a chromate conversion process which protects and prepares the steel for the final coating. The exterior is then finished with a specially formulated clear acrylic for durability and shine.

DYNA COAT Color Fence Framework

Residential

Commercial

Industrial

Dyna Powder Coat System

- 
- All Products Manufactured in the USA
 - Multi-Stage Wash System
 - State of the Art Electrostatic Equipment
 - Highest Quality Polyester Powder
 - Meets and Exceeds all Industry Standards

Our color framework is cleaned and pretreated in a five stage high powered industrial wash system. After drying, premium polyester powder is applied using state of the art electrostatic equipment. The pipe and tube is then baked at a time and temperature that assures complete curing of the coating. The process includes detailed inspections to insure adhesion and durability. Our properly cured polyester powder, offers a superior long term finish to meet and exceed our customer's needs.
